“Handled with Care - by People Who Care”

Record-breaking year for Pallet Network Sector....

The ‘Association of Pallet Networks’ (APN) has announced a record breaking 2016 with volumes breaking previous records.

The Chairman of the APN, Paul Sanders reports that in the first nine months of 2016 APN members delivered over 17.5 million pallets, which is a 4.5% increase on the previous year, before the seasonal rush.

The level of increase could well be down to the expansion of the home delivery market, deliveries made to residential addresses increased by more than 11%, and we expect that this will continue to grow.

TPN’s cutting edge technology, including full track and trace, scan data and POD retrieval are all uploaded in real time and we give our customers full access to this via a web based booking platform. There is also a track and trace link on the TPN homepage for consignee’s to track their delivery. We are pleased to be able to offer our pallet network customers a system sophisticated enough to rival the parcel sector. Contact our sales team to find out more; sales@justydl.com.

TPN plan to be imminently consolidating and booking in Amazon deliveries...

Deliveries into Amazon have presented various issues for the pallet network sector over the years, with single depot's having up to 15 timed deliveries' per day scheduled for the same vehicle. TPN have taken the positive step of reaching a consolidation agreement with Amazon whereby the carrier books in Amazon deliveries. Our customers will simply need to provide us with the Amazon ASN (advanced shipping notice) and we will do the rest. Can your current carrier do this?
